Led Cube Projects

About this project

1. Carefully solder the anodes of 9 LEDs together making an E shaped structure.
2. Cut the unnecessary parts of the anode after soldering.
3. Repeat the process producing 3 such layers.
4. Solder the 3 layers together by

# Read Free Arduino Led Cube Projects.

Basically an LED cube is a 3 dimensional cube made out of Light Emitting Diodes (LEDs). The Cube can be made in various ways but for this project, a simple setup is used that is controlled by an Arduino Uno microcontroller.
