TIME FRAME FOR CONDUCTING THIS ACTIVITY

The rarest bird beaks in the world. What we've seen so far is a very general classification, based on the feeding habits of the different species. However, not all species comply with this classification. In fact, some species of birds have very strange beaks adapted to specific functions, which give them a unique, fascinating appearance.

Birds, their different beaks and the functions they perform

I have 3 birds that all look the same so i don't know if male or female but out of the 3 one of them keeps biting at the 2 other birds beak and feet. Last night there was blood all over the perches and I have 7 perches so I was thinking one would be dead in the morning from the bite but was fine. I couldn't see any blood on the birds. So I thought it was ones feet which i seen no blood but so ...

Bird keeps biting other birds beak and feet.? | Yahoo Answers

The shape of beaks and feet allows each kind of bird to feed in a particular habitat. 1. Marsh or Wading Birds-a marsh bird wades in the water, needs a long neck for fishing, long legs for wading, and a narrow, pointed bill for spearing its prey (fish, frogs, snakes) 2. Water or Swimming Birds-these birds squeeze water from the food (fish, plant material, etc.) they catch.
