Marine Diesel Engines

During the year 1924

Mirrlees developed a small semi-diesel engine to meet the demand for a light-weight model. this was the "Simplex" engine, having a bore of 12 inches and a stroke of 13 inches, to give 40 BHP per cylinder at 325 r.p.m.

Online Library Blackstone

Originally this engine was a hot bulb type with external heating lamp, but was latterly converted to a high compression ignition engine.
