~~Control Valve Handbook Third Edition [PDF]~~

The flow coefficient of a device is a relative measure of its efficiency at allowing fluid flow. It describes the relationship between the pressure drop across an orifice valve or other assembly and the corresponding flow rate.. Mathematically the flow coefficient  $C_v$  (or flow-capacity rating of valve) can be expressed as  $C_v = \frac{Q}{\sqrt{\Delta P}}$  where: Q is the rate of flow (expressed in US gallons per minute),
