D Bus Bmw
D-Bus is an IPC mechanism initially designed to replace the software component communications systems used by the GNOME and KDE Linux desktop environments (CORBA and DCOOP respectively). The components of these desktop environments are normally distributed in many processes, each one providing only a few —usually one— services.

Description. We offer an intelligent and high quality USB IBUS interface for IBUS/KBUS/PBUS and any other LIN-BUS communication. Unlike much of the proposed Ibus interfaces and circuits with external pullup resistors on the Internet, our IBUS interface is recognized by your computer or Android device as a real serial port and the connection with your BMW is running by a special IBUS integrated ...

Two wire K-CAN Bus systems (Body Bus), connecting several control modules, sensors and actuators, became the norm in BMW vehicles beginning with the 2002 model year. The K-CAN, a 2-wire bus, connects the instrument cluster, climate control (IHKA), airbags (SRS), lighting system and tire pressure control.

Lately it seems that a lot more 1999-2005 BMW 3-series owners (E46 chassis) have been having problems with the K-Bus. When I say that there is a problem with the K-Bus they look very confused and ask, "What's that?" Last updated February 1, 2019. Every once in a while I get a call from someone who has all sorts of problems with their E46 BMW. Not just door locks, but, turn signals, sunroof, windows, dash lights and the list goes on.

BMWGM5 E46 K-Bus Information
In an automotive CAN bus system, ECUs can e.g. be the engine control unit, airbags, audio system etc. A modern car may have up to 70 ECUs - and each of them may have information that needs to be shared with other parts of the network. This is where the CAN standard comes in handy: The CAN bus system enables each ECU to communicate with all ...
