TCM Continental O-300-A - Norvic Aero Engines

The O-300 is what might be called a "48" engine. In other words, a combination of rpm and manifold pressure that equals 48 is 75% power. For example, 24" mp x 24 (00) rpm = 75%. Other 75% settings might be 23" x 2500, 22" x 2600 or 21 x 2700 rpm. Other power settings can be determined by consulting the chart.

The O-300 engine is a peach really. Smooth and nice-sounding. Contyplodicus engines are better for low utilisation aircraft when compared to Lycosaurus because the cams are on the bottom of the engine sitting in the oil. Low utilisation Lycos from experience are prone to corrosion on the cams and followers.

The Continental O-300-powered C172s ("H" model in particular) This is yet another little romantic piece about a a type/variant of aircraft I have flown this year. It's about the very early Cessna 172s with the 145-hp O-300 engine. These are getting rather rare in Europe, at least on the rental scene.

Continental Motors has received EASA type certification for the 300hp V6 turbocharged diesel piston engine, the CD-300. It's the sixth jet fuel (diesel) aircraft engine that Continental has certified. The CD-300 series engine has a three-litre displacement and generates 300hp (221 kW) . The CD-300 also has single lever control and a dual, fully redundant electronic engine and propeller management system (FADEC).
