Skills Test B Measuring And Calculating Answers Aptitude testsassess proficiency in language for language use i.e. language performance itself. They do not assess the use of language to undertake a non-linguistic task. Problem one: definition of student success in language learning; should we consider language learning for other goals.

Language testing and methods of assessment standardise for incentives, effort, and other skills that determine performance on the task in measuring any skill, yet this is rarely done in conducting skill assessments. Standard measures of cognitive skill have been shown to be sensitive to incentives and levels of other skills. Test scores for young children can be
