Guide For Macro Economics

Macroeconomics considers the aggregate performance of
all markets in the market system and is concerned with the
choices made by the large subsectors of the economy—the
household sector, which includes all consumers; the
business sector, which includes all firms; and the
government sector, which includes all government
agencies.

Macroeconomics is ' non-experimental ' : like, e.g., history, macro-economics cannot conduct controlled scientific experiments (people would complain about such experiments, and with a good reason) and focuses on pure observation. Because historical episodes allow diverse interpretations, many conclusions of macroeconomics are not coercive.

It ' s a fascinating study of psychology, of why people make the decisions they make, and how resources are spread out around the world. Economics is studied in two main strands: Microeconomics is the study of how individual parties (people, groups, and businesses) use their wealth. Macroeconomics looks at entire economies. The unemployment, inflation, and monetary challenges of cities, countries, and continents.
