The dominance of the conflict perspective in the work – family literature is rooted in scarcity theory, which assumes that the personal resources of time, energy, and attention are finite, and that the devotion of greater resources to one role necessitates the devotion of lesser resources to the other role (Edwards & Rothbard, 2000; Marks, 1977; Sieber, 1974). Thus, individuals who participate in both work and family roles are likely to experience conflict between these roles.

When work and family collide: Deciding between competing ...

One result is that while 42% of mothers with some work experience reported in 2013 that they had reduced their work hours in order to care for a child or other family member at some point in their career, only 28% of fathers said the same. Similarly, 39% of mothers said they had taken a significant amount of time off from work in order to care for a family member (compared with 24% of men).

Women more than men adjust their careers for family life ...

And without that separation, it can be easy for work to start spreading throughout your home and invading the rest of your life, making it hard to disengage and spend time on other things that really matter (like your family, friends, hobbies, and life). I speak from experience.
